Jointly mentioned as "Both Parties"

Whereas
I. Both Parties have entered into the RIPE NCC Standard Service Agreement with the RIPE NCC

II. The RIPE NCC has registered IPv4 addresses to the Offering Member including the IPv4 address allocation [allocation] (the Allocation)

III. The Offering Member does not need the Allocation and has not received it during the last 24 months.

IV. The Receiving Member wants to receive an Additional Allocation in order to make assignments {(in case of temporary transfer) from the moment the transfer is completed until [date]}.

Agree the following:

1. Both Parties wish the Allocation records to be transferred from the Offering Member's account to the receiving Member's account {(in case of temporary transfer) from the moment the transfer is completed until [date], on which date the Allocation shall automatically transferred back to the Offering Member}.

2. The terms and conditions of this transfer may be the subject of a separate agreement of which the RIPE NCC is not part. In the event a provision in a separate agreement is in conflict with a provision in this agreement or the RIPE NCC Standard Service Agreement, the provision in this agreement and in the RIPE NCC Standard Service Agreement shall prevail.

3. Both Parties acknowledge that due to this transfer, all rights and obligations that arise from the RIPE NCC Standard Service Agreement [Account No. of Offering LIR from the LIR Portal] with regards to the Allocation will be also transferred from the Offering Member to the Receiving Member

4. Any other rights and obligations that arise from the RIPE NCC Standard Service Agreement including any other rights to IPv4 allocations registered to the Offering Member by the RIPE NCC, are not affected by this agreement.

5. Both parties acknowledge that the RIPE NCC shall not be responsible and cannot be held liable for this transfer, or for the non-fulfillment of this transfer due to restrictions from the RIPE policies.

Thus agreed by persons authorised to represent both parties:
