1Net & Other Developments in Internet Governance

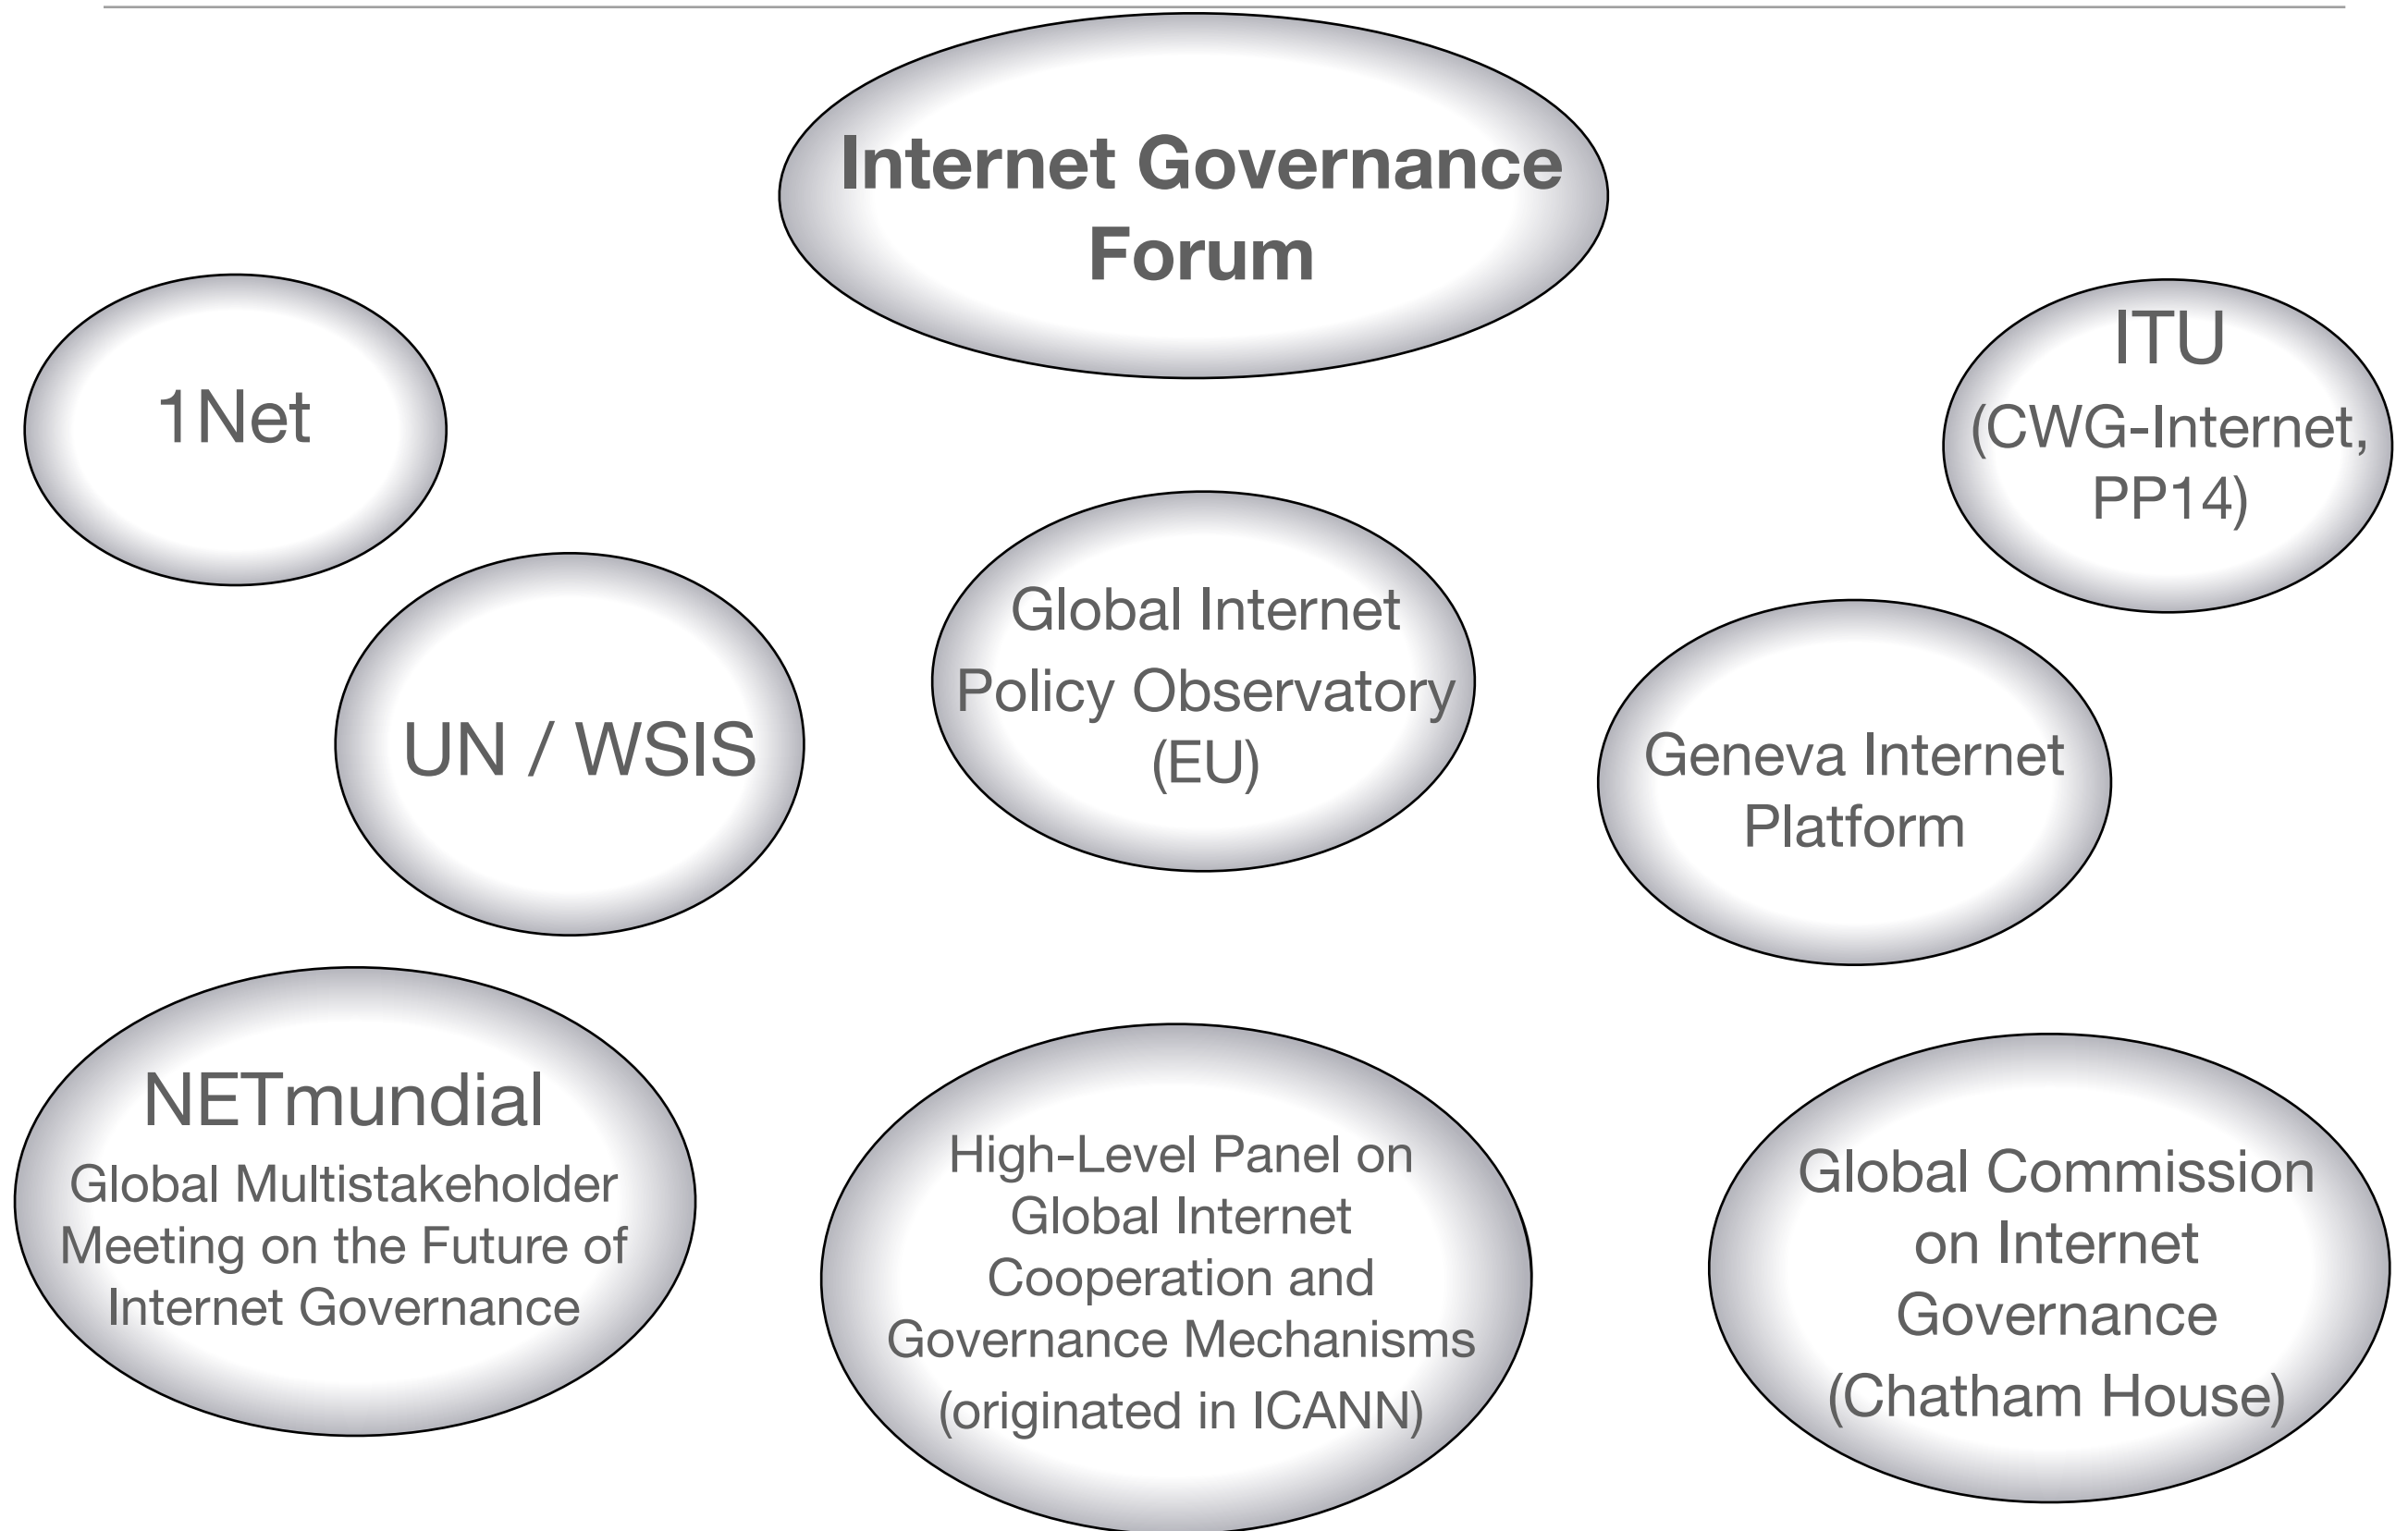

Paul Rendek
Director of External Relations
RIPE NCC

rendek@ripe.net

- Meeting of I* leaders in October 2013
- A statement of common positions and priorities for Internet governance
- Four key points:
 - ▶ *Global cohesion, threatened by national fragmentation and distrust created by surveillance practices*
 - ▶ *Support for continued multi-stakeholder processes to address Internet governance issues*
 - ▶ *Acceleration of efforts to globalise ICANN and the IANA functions*
 - ▶ *Global prioritisation of IPv6 adoption*

Many Forums and Discussions

3

- A neutral, open forum to discuss Internet challenges
 - Mailing list (discuss@1net.org)
 - Online discussion forum (forum.1net.org)
 - Steering committee (1net.org/steering-committee)
 - 21 members (from Bus, Tech, Academia, Civil Society)
- Launched following I* Montevideo meeting
 - Roughly concurrent with announcement of NETmundial meeting, but TWO separate things

- Organisers: CGI.br (multi-stakeholder BR org) and 1Net
 - With Argentina, Brazil, France, Germany, Indonesia, South Korea, Tunisia, Turkey, United States of America, [India?]
- A one-off event?
 - RIPE NCC remains focused on IGF as primary Internet governance venue - all NETmundial outputs should feed into IGF!
 - A potential opportunity for making further progress on Internet governance issues
- RIPE NCC = an interested observer, ready to contribute and participate where useful

- Inputs/outcomes:
 - ▶ *Principles for global Internet governance*
 - ▶ *Future roadmap for Internet governance development*
- Issues for the RIPE NCC
 - Ensuring issues and concerns of our membership/ community are represented
 - Globalisation of IANA, ICANN
 - Ensuring multi-stakeholder engagement and decision-making in Internet governance

- Proliferation of discussions - a problem?
 - Are some “more important”?
- Is 1Net a positive contribution to the Internet governance space?
- Is the multi-stakeholder model working in global Internet governance?
- What do you hope to see come out of NETmundial?
- Where will we be at the end of 2014?

- Government to support the multi-stakeholder model moving forward
- We call on governments in the RIPE NCC service region to support the I* organisations by recognising & endorsing their various roles in Internet administration
- Work with the RIPE NCC and our industry partners on supporting the deployment of IPv6
 - ▶ *Are governments doing enough?*
