

IPv4 Transfers in the RIPE Region

Netnod Spring Meeting 2013

Andrea Cima
andrea@ripe.net

Allocations From the Last /8

- The RIPE NCC reached the last /8 on 14 September 2012
- LIRs can receive **one** /22 (1,024 IPv4 addresses), even if they can justify a larger allocation
 - LIRs must already have an IPv6 allocation from an upstream LIR or the RIPE NCC
- No new IPv4 Provider Independent (PI) address space is currently being assigned
- 1150 /22s issued so far

Need More Address Space?

- Three different types of intra-RIR transfers:
 - 1) Mergers and acquisitions
 - 2) “Normal” transfers of allocations
 - 3) Legacy space transfers
- An inter-RIR transfer policy proposal is currently under discussion that would allow transfers between regions with reciprocal policies

1) Mergers and Acquisitions

- If an organisation (or part of it) is being sold, the Internet number resources in use by its network can be transferred
- Documentation requested:
 - Merger/purchase agreement
 - Company registration papers for both parties
 - New “Independent Assignment Request and Maintenance Agreement” (only for Provider Independent resources)
- Based on procedural document ripe-579

2) “Regular” Transfers of Allocations

- Policy requirements
 - Only provider aggregatable (PA) space can be transferred
 - Transfers between LIRs only
 - The IP block can't contain assignments or sub-allocations
 - Minimum transfer size is a /22
 - Receiving LIR must justify need
- Documentation requested:
 - Signed RIPE NCC Transfer Agreement
 - Company registration papers for both parties
 - RIPE NCC additional allocation (pre)approval for receiver
- Based on ripe-582, section 5.5

3) Legacy Space Transfers

- IPv4 address space that was distributed prior to the formation of the Regional Internet Registry (RIR) system
- The RIPE NCC is able to support transfers of legacy space when this is covered by a “Legacy Space Agreement”
 - Between end user and LIR; or
 - Between LIR and RIPE NCC
- The RIPE NCC is not involved in the transfer when the legacy resources are not covered by a “Legacy Space Agreement”

IPv4 Transfer Listing Service

- Enables LIRs looking to transfer allocations to find receiving parties
- LIRs can also request resources
- Member only service through the LIR Portal
- The RIPE NCC has no interest in financial transactions
- Transfers must follow transfer policy in ripe-583, section 5.5
- Currently 6,144 IPs offered vs 1,714,176 requested
- Data available in JSON format

IPv4 Transfer Listing Service

The IPv4 Transfer Listing Service is a platform that enables RIPE NCC members to list and exchange the IPv4 address space they hold and no longer need. This can be transferred between RIPE NCC members as described in "IPv4 Address Allocation and Assignment Policies for the RIPE NCC Service Region". More information about transfers of IPv4 address space can be found [here](#).

Before any resources can be transferred the receiving LIR must send an [initial/additional allocation form](#) to the RIPE NCC for [pre-approval](#). The request must state the listing service is being used and the desired allocation size.

By using this service you explicitly express your agreement with the [IPv4 Transfer Listing Service Terms and Conditions](#).

Feedback

Request Unused IPv4 Address Space

The IPv4 Transfer Listing Service enables RIPE NCC members to list and exchange the IPv4 address space they hold and no longer need. For more information about this service, please see the IPv4 Transfer Listing Service [FAQs](#).

Requested IP Allocation

Current request There is **no request** listed for your registry.

Allocation size

Choose One ▾

Transfer duration

- Temporary
- Permanent

Publish

Permanent and Temporary Transfers

Accepted Policy Proposals (1)

- “Transparency in Address Block Transfers”
 - Policy proposal 2012-05
 - To increase the transparency of the transfer market for IPv4 addresses
 - RIPE NCC to publish a record of all transfers conducted under the transfer policy
 - Non-approved transfers will be published as aggregate statistics
 - Status: currently being implemented by the RIPE NCC

Accepted Policy Proposals (2)

- “Revert “Run Out Fairly””
 - Policy proposal 2012-06
 - This proposal reverts the changes made by “Run Out Fairly”
 - Was 3 months allocation / assignment period
 - New allocation / assignment periods
 - 12 months allocation
 - 24 months assignment
 - Status: currently being implemented by the RIPE NCC

Current Transfer Policy Proposals (1)

- “Policy for Inter-RIR Transfers of IPv4 Address Space”
 - Policy proposal 2012-02
 - This proposal describes how transfers of IPv4 address space between LIRs of different Regional Internet Registries will occur
 - Section 5.5 applies
 - Need for policy compliance between RIRs:
 - Originating party complies with policy of originating RIR
 - Destination party complies with policy destination RIR
 - RIRs must have “complementary” as well as reciprocal policies
 - Status: review phase

Current Transfer Policy Proposals (2)

- “Intra-RIR Transfer Policy Proposal”
 - Policy proposal 2012-03
 - This proposal changes the period for transferred allocations from 12 to 24 months
 - Status: review phase

Current Transfer Policy Proposals (3)

- “RIPE NCC Services to Legacy Internet Resource Holders”
 - Policy proposal 2012-07
 - Status: discussion phase (currently a lot of input being received)

Brokers

- Some members may decide to use a broker to facilitate the transfer process
- Little contact with brokers to date, but the RIPE NCC is ready to engage
 - Helping them to understand the policies and processes
 - Promoting and supporting the correct use of the RIPE Database

Where Does the RIPE NCC Stand?

- Our ultimate priority is keeping the registry up-to-date
- Ensuring that transfers follow RIPE Policy
- Supporting our members through the transfer process
- The RIPE NCC has no interest in financial transactions

What's Next?

- Increasing transparency
 - New transfer section on website (accessible from the homepage)
- Listing “recognised brokers” on the website
 - Brokers who have signed an agreement to follow RIPE Policies
- Simplifying the transfer process
 - One single transfer form in the LIR Portal (upcoming)
