IDN in Montenegro

07th September 2011. / presented by

Željko Drašković,
CTO
doMEn d.o.o.

IDN - general

IDN = Internationalized Domain Names

Technical guidelines described in RFC3490
Implementation started in 2003
47 TLDs up to now
In 2009 started IDN ccTLDs program

Montenegro specific

- Official language: Montenegrin

- Latin and cyrillic scripts are equal
- 32 letters

Express yourself.

Plans

- Implementation of IDN in .ME planned for Q4/11 or Q1/12

- Phase 1>
  Latin script of Montenegrin language (Latin-1)

- Phase 1b>
  Cyrillic script, same as Serbian language due to not having two new letters in Unicode table

Me

Express yourself.

Plans, Phase 2

- All European latin-script based languages (German, French, Italian, …)

- Cyrillic-script based languages (Russian, Bulgarian, …)

- Any other language as requested (Arabic, Middle East; Far East, …)

Express yourself.
