

DB-WG Ripe 54

Action Point Status

New Actions

53.1	WW144	Close AP50.1 (To make the country attribute on inetnum and inet6num optional and multiple) and properly reformulate it.
53.2	RIPE NCC	To check and point out the requirement accept ASN32 systax to various software developers: including but not limited to irrtoolset, quagga etc
53.3	RIPE NCC	To make sure that if there is a "flag day" for ASN32 behaviour then the planning and introduction for this is done properly and advertised appropriately

New Actions (2)

53.4	WW144	Alert Routing WG about the implications of the ASN16 to ASN32 transition on tools.
53.5	WW144	Wait for the formal consensus of the ENUM WG on renaming NON-REGISTRY to OTHER (in the ORG object type) and then ask the RIPE NCC to make the change

Old Actions

51.2	RIPE NCC	Check gnupgp compatibility before release of dated PGP signing functionality
51.8	RIPE NCC	To properly implement DB behaviour to always return irt: object on address queries, if it exists.
51.9	RIPE NCC	To contact a subset of the spam tool writers and make sure that they are aware of the change in behaviour as required by AP51.8
