

**RIPE NCC**

RIPE NETWORK COORDINATION CENTRE

# RIPEstat

## Internet Measurement Day: Serbia

Christian Teuschel | 12 Sep 2022 | Internet Measurement Day - Serbia

# What is RIPEstat?

- Open data platform for RIPE NCC data
  - RIPE Database, RIS and RIPE Atlas
- Information service for Internet-related data
- Data insights for Internet number resources, hostnames (FQDN) and countries

# RIPEstat Data Sources Available

- More than 35 different datasets
  - RIPE Database (INR, IRR) and other RIRs
  - BGP routing data (RIS)
  - RIPE Atlas, M-Lab, Speedchecker etc.
  - Geolocation
  - RPKI
  - More details at <https://stat.ripe.net/data-sources>
- New datasets are constantly added!
  - E.g. new feature to check multiple DNS-based blocklists in real-time

The MLAB logo features the text 'MLAB' in a bold, sans-serif font, with a horizontal line under the 'L'. It is enclosed in a white rectangular box with a subtle drop shadow.

**MLAB**

The Broadband Speedchecker logo includes the word 'BROADBAND' in a large, bold, black font, with a speedometer icon integrated into the letter 'O'. Below it, the word 'speedchecker' is written in a smaller, red, lowercase font. The logo is contained within a white rectangular box with a drop shadow.

**BROADBAND**  
speedchecker

The MaxMind logo features a network diagram of blue nodes and lines above the text 'MAXMIND' in a blue, sans-serif font. It is presented in a white rectangular box with a drop shadow.

**MAXMIND**

The Spamhaus logo displays the word 'SPAMHAUS' in a bold, blue, sans-serif font, enclosed in a white rectangular box with a drop shadow.

**SPAMHAUS**

...

# RIPE 82

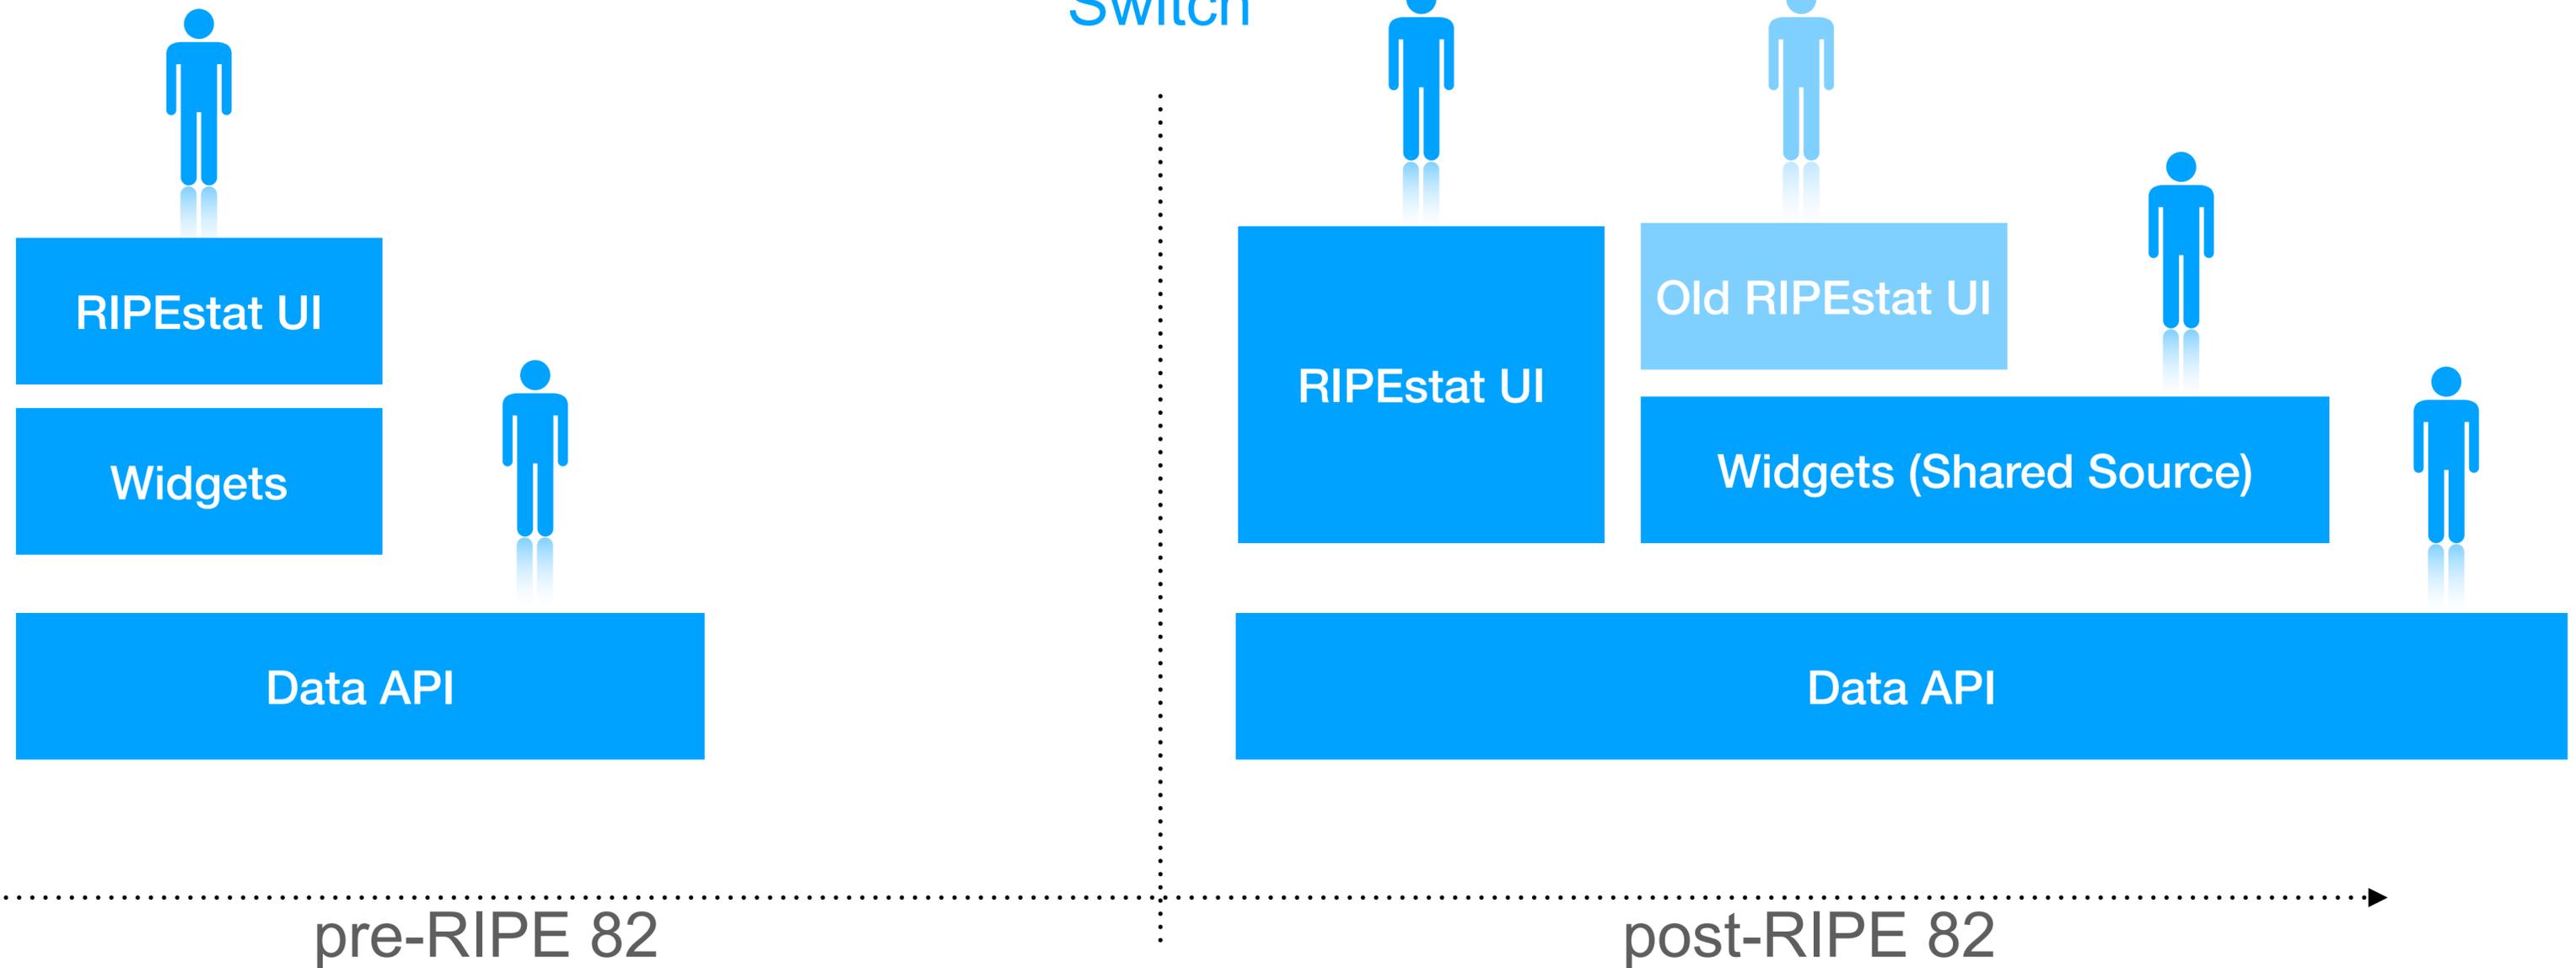

- RIPE 82 meant significant changes to RIPEstat UI
- And 10 Year Anniversary of RIPEstat

# RIPEstat APIs after RIPE 82

- Public interfaces

# RIP Estat UI2020

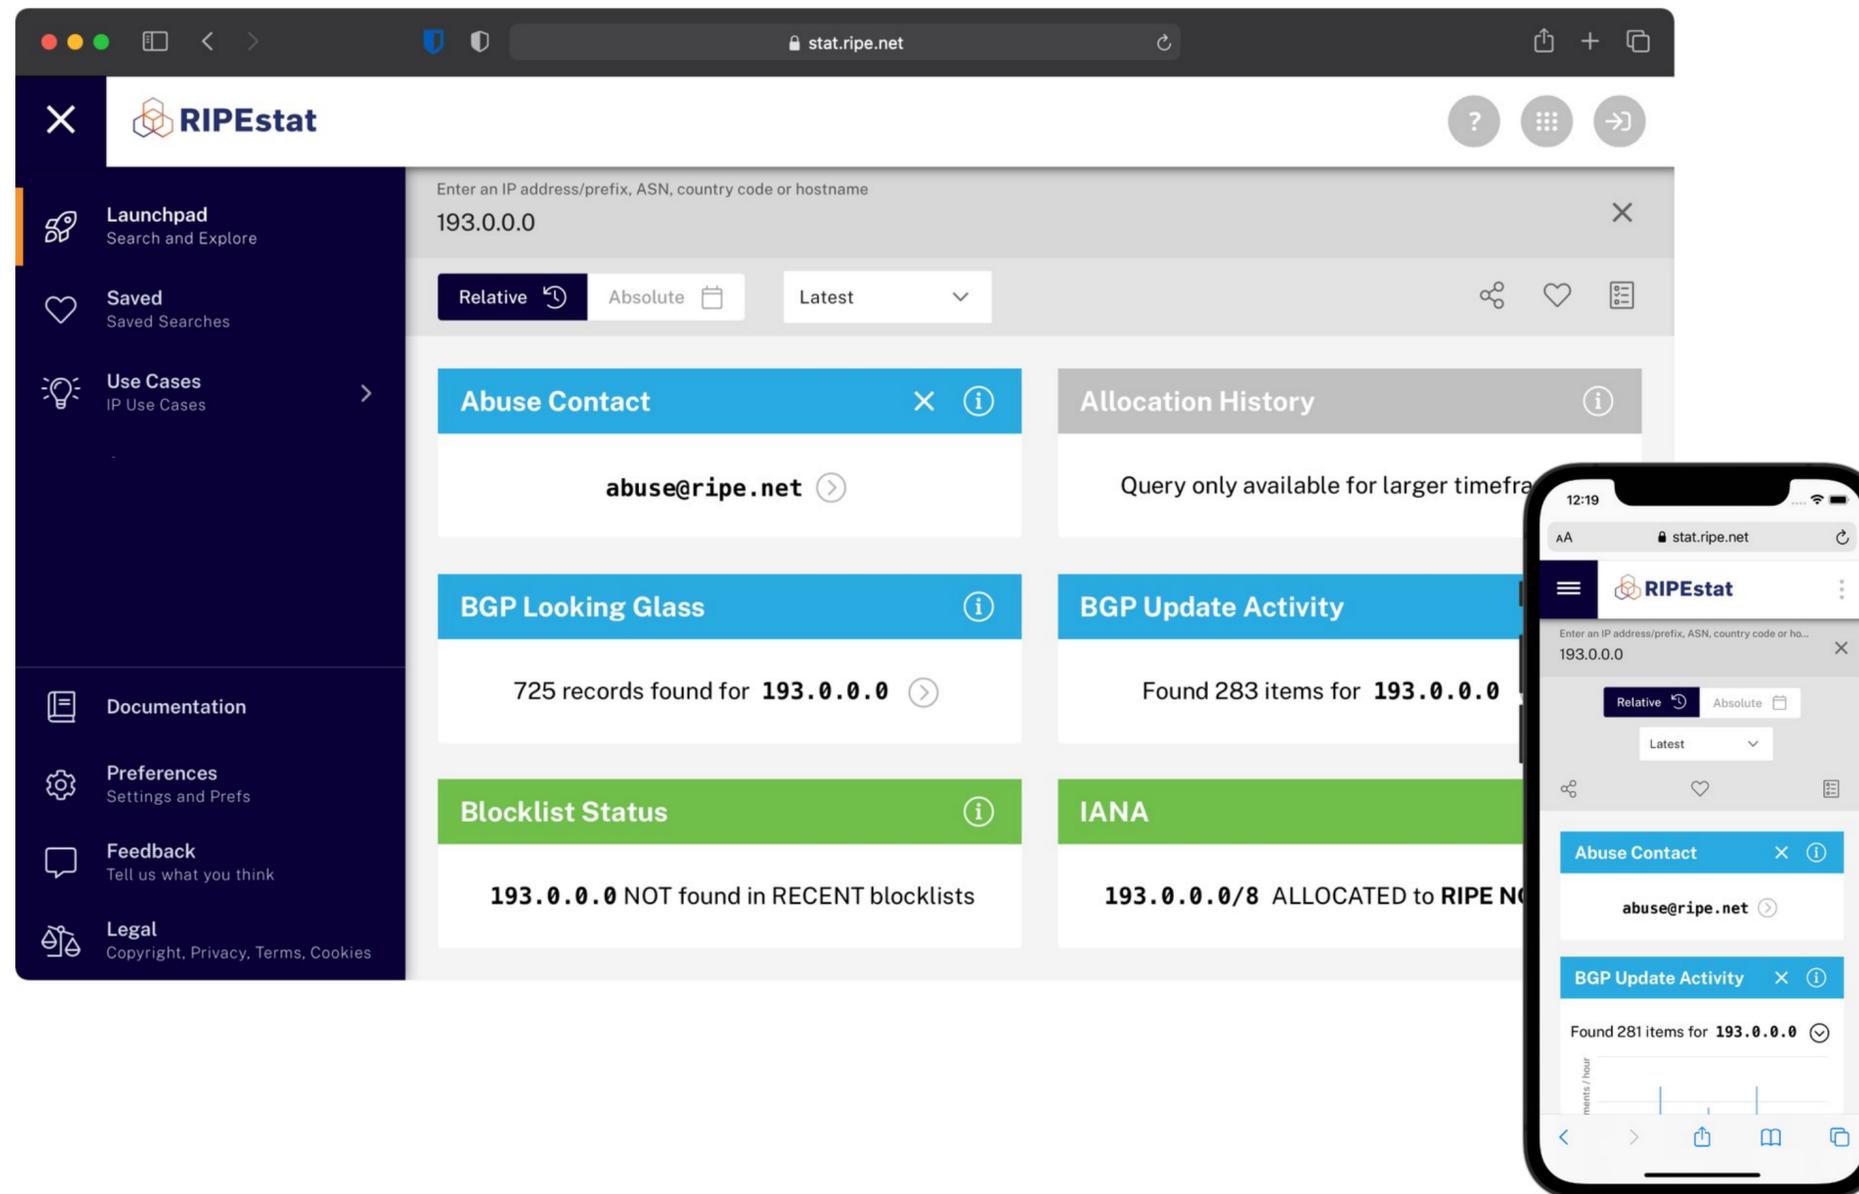

- Guiding principles and benefits of the new UI
  - Responsive and mobile friendliness
  - Self contained “app”
  - User-driven presentation/configuration
  - Universal search context
  - Shareability

# RIPEstat UI2020

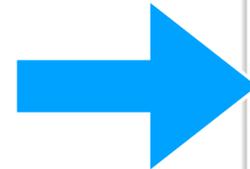

- Mobile friendliness is built in!

# RIPEstat UI2020

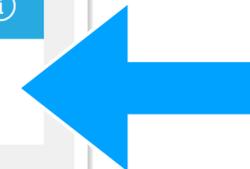

Side Menu

“Universal Search”

Info Cards

# RIPEstat UI2020

- Help is built in too!

1 Universal Search (resource, absolute or relative timeframe)

With the universal search bar, there is a single search context that applies to all your info. Search for any resource and add relative or absolute timeframes to filter results.

Feature tour

Documentation

# RIPEstat UI2013 Or UI2020

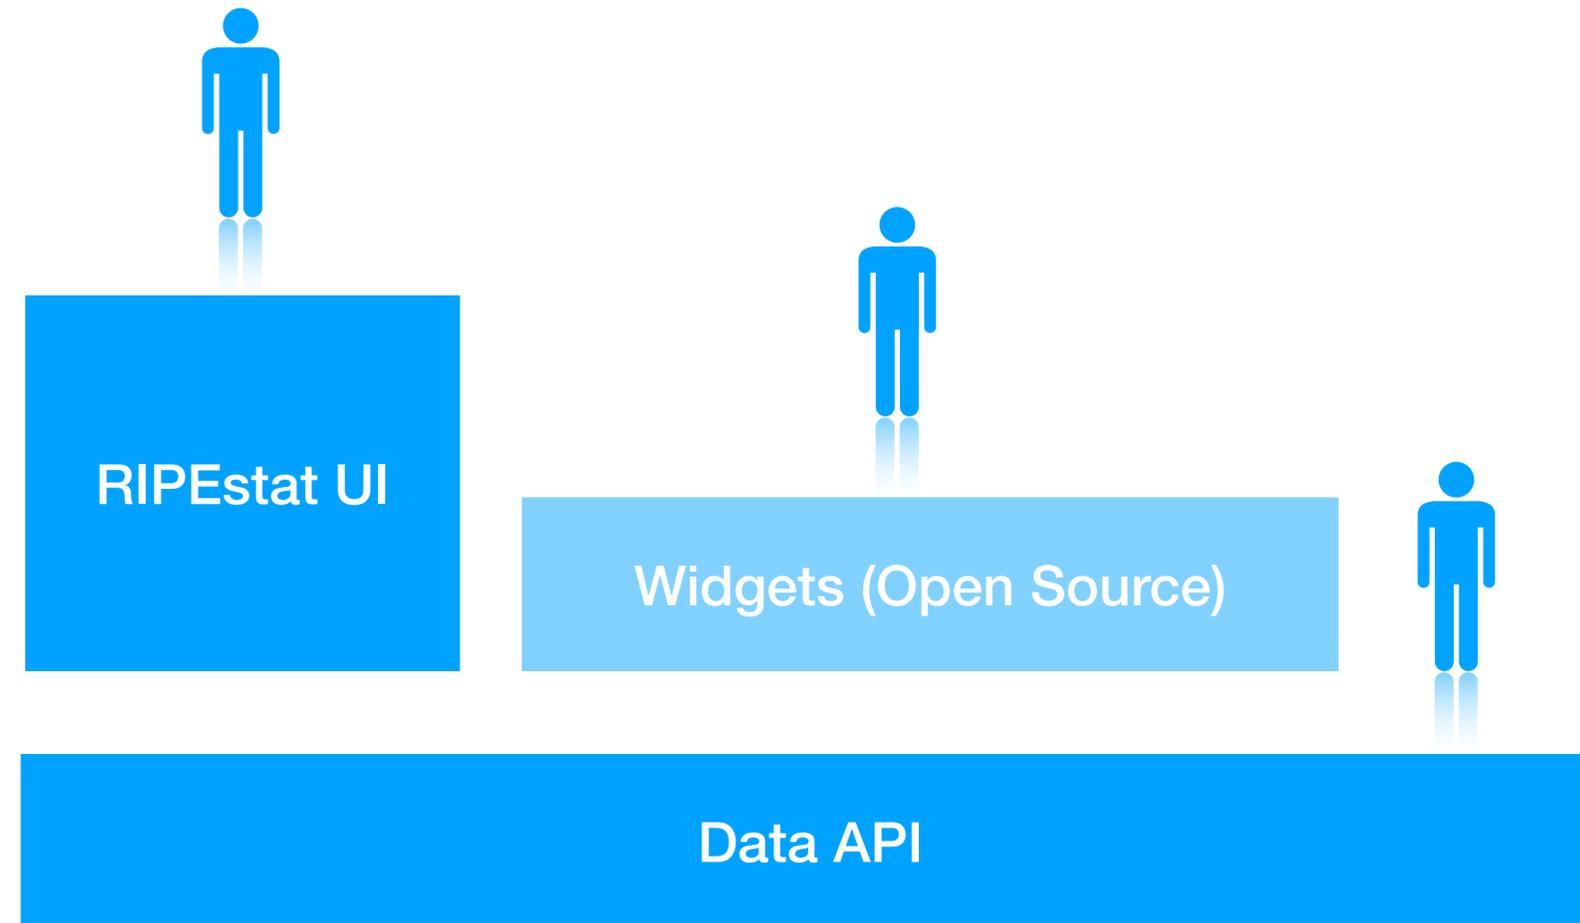

- Choose UI that best suits your needs (for the time being)

The screenshot shows the RIPEstat website with a navigation bar at the top. The bar contains the RIPEstat logo, a search icon, and a button labeled "Go to the old UI". Below the bar, the main content area features the heading "Providing open data and insights for Internet resources" and a paragraph describing the service. A button labeled "Go to the RIPEstat app" is positioned below the text. Two large blue arrows point from the right side of the image towards the "Go to the old UI" and "Go to the RIPEstat app" buttons, with the labels "UI2013" and "UI2020" respectively. At the bottom of the screenshot, a laptop and a smartphone are shown displaying the RIPEstat interface on different devices.

# RIPEstat APIs in the Future

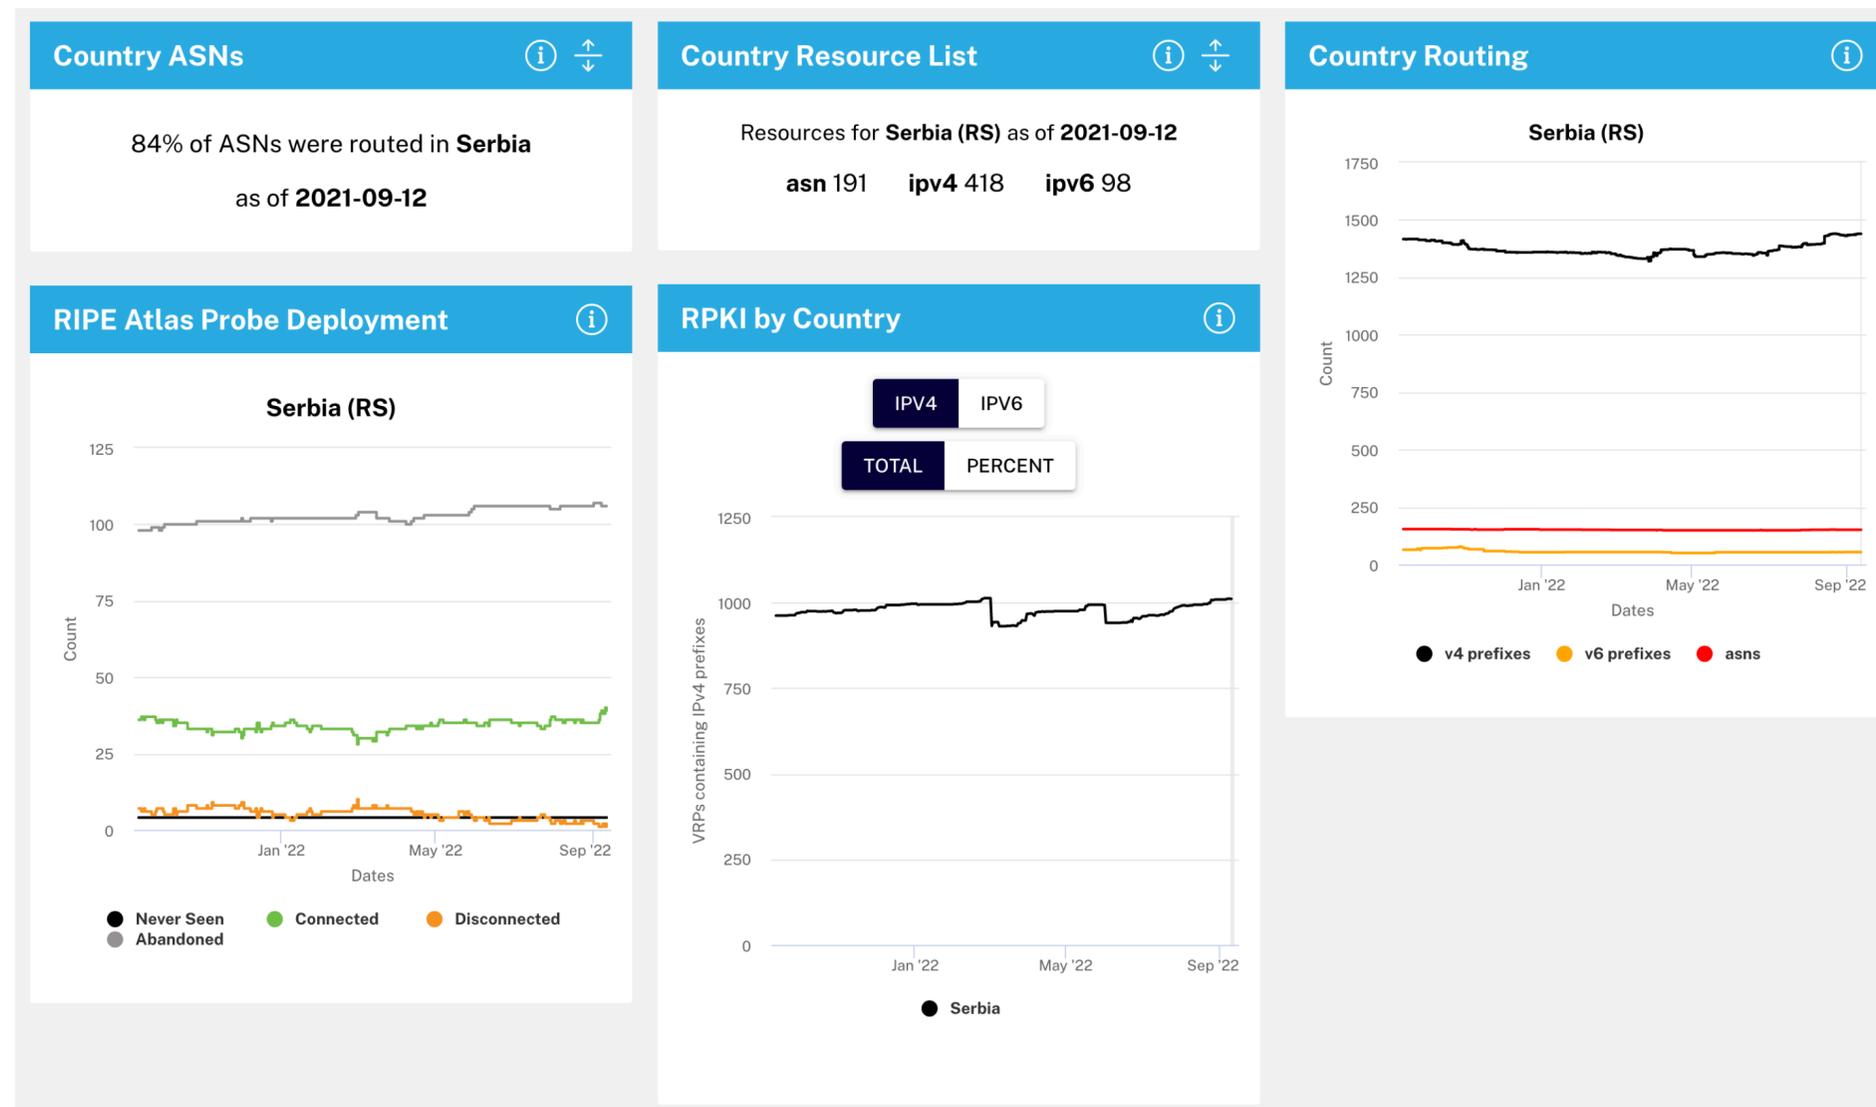

- Public interfaces

# UI Highlights

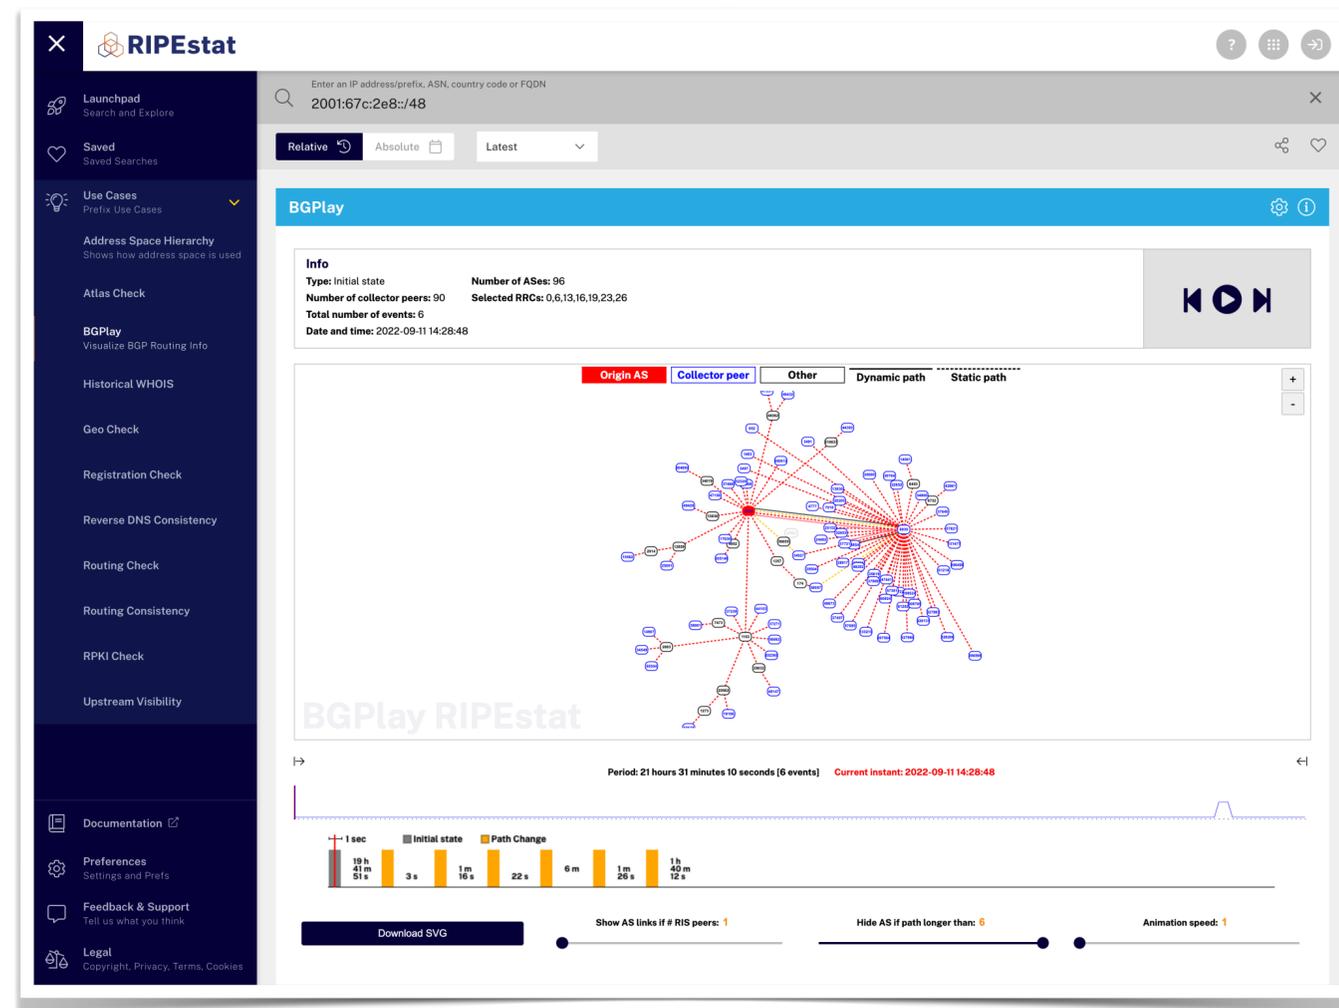

- Country Statistics for Serbia

# UI Highlights

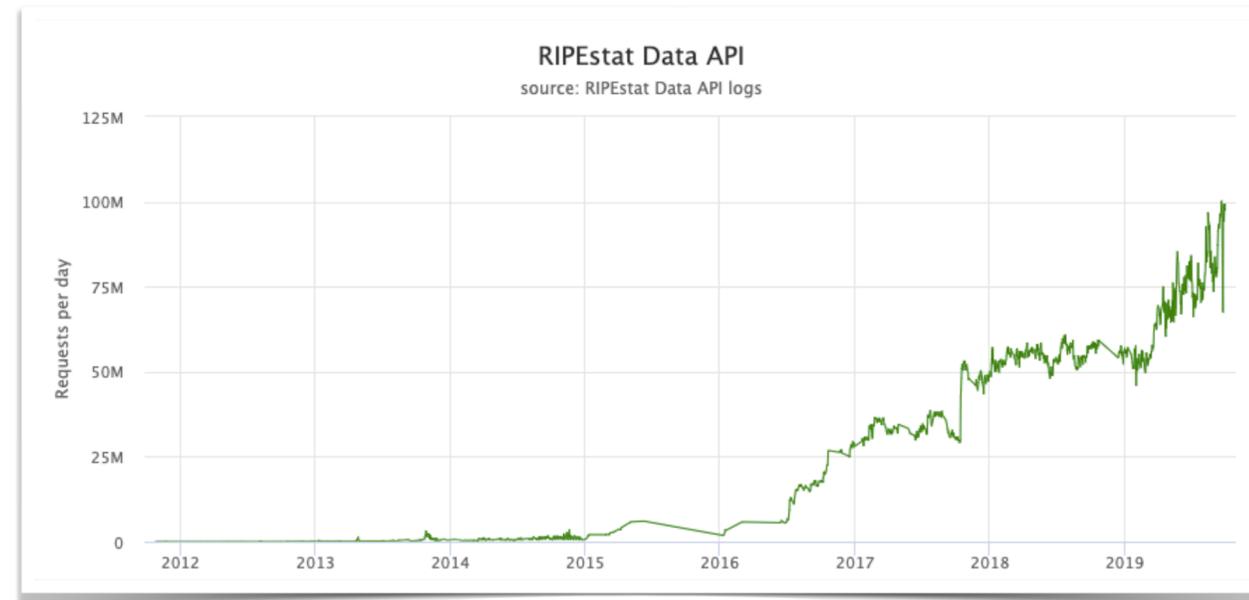

- BGPlay
  - Visualises state of BGP routing as seen by RIS ([ris.ripe.net](https://ris.ripe.net))
  - BGPlay has many use cases:
    - Visibility analysis (IPv4/IPv6)
    - Route flapping
    - etc.

# RIPEstat Data API

- Core of RIPEstat
- Powering RIPEstat UIs and many other use cases

# RIPEstat Data API

- JSON-RPC API

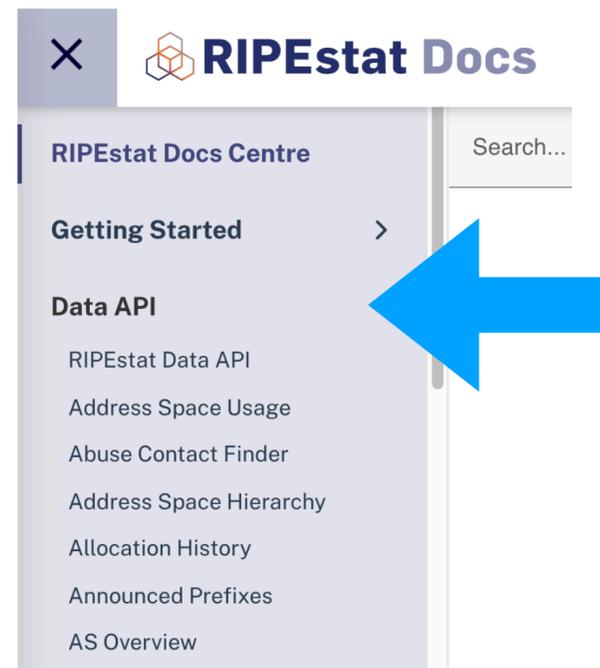

- E.g. [https://stat.ripe.net/data/prefix-overview/data.json?max\\_related=50&resource=193.0.20.0%2F23](https://stat.ripe.net/data/prefix-overview/data.json?max_related=50&resource=193.0.20.0%2F23)

- More than 50 data calls

- Documentation

- <https://stat.ripe.net/docs/>

  - URL structure and parameters
  - Register as a regular user
  - etc.
- Specific API endpoints

# RIPEstat Data API: Using It!

- Select a specific API endpoint in the documentation

The screenshot shows the RIPEstat Docs website. The left sidebar contains a navigation menu with the following items: RIPEstat Docs Centre, Getting Started, Data API (expanded), RIPEstat Data API, Address Space Usage (selected), Abuse Contact Finder, Address Space Hierarchy, Allocation History, Announced Prefixes, AS Overview, AS Path Length, AS Routing Consistency, ASN Neighbours, ASN Neighbours History, Atlas Probe Deployment, Atlas Probes, Atlas Targets, BGP State, BGP Update Activity, BGP Updates, and BGPlay. The main content area is titled 'Address Space Usage' and includes a search bar, a description of the data call, a REST client snippet, and a JSON response viewer.

**Address Space Usage**

This data call shows the usage of a prefix or IP range according to the objects currently present in the RIPE database. The data returned lists the assignments and allocations covered by the queried resource as well statistics on the total numbers of IPs in the different categories.

```
GET /data/Address-Space-Usage/data.json?resource=193/23
```

HIDE EXPAND

# Development Outlook

- User Interface
  - Further improving new UI
  - Open sourcing widget UI (= building block of old UI)
- Service improvements
  - Reliability and performance
  - More testing
- Data quality improvements
- Data API revamp
- Open for more collaborations on data
