# Internet Measurements during COVID-19

Petrit Hasani **RIPE NCC** 

# **RIPE Labs**

- Lots of interesting and relevant information https://labs.ripe.net/covid19
- Great operator collaboration
- Virtual Hackathons
- COVID-19 and Network Security
- Organising online events
- and lots more

Petrit Hasani 21 April 2020 Albanian Networking Community

# Measuring Network Stability

# **RIPE Routing Information Service**

- RIPE Routing Information Service (RIS)
- RIS collectors collect routing data in BGP
- Shows a history of changes
- RIS makes snapshot every 8 hours
- Differences between show dynamics of the network
  - network maintenance
  - malicious changes and re-routes

Petrit Hasani 21 April 2020 Albanian Networking Community

# What did we expect?

- Less maintenance
- Restricted access to data centers
- And therefore fewer changes in BGP

Petrit Hasani 21 April 2020 Albanian Networking Community

5

### But what did we see?

Number of ASes with any type of change in BGP

No visible decrease in the number of changes 

Petrit Hasani | 21 April 2020 | Albanian Networking Community

# Time

# **Changes in BGP by Type**

Petrit Hasani | 21 April 2020 | Albanian Networking Community

- **Blue:** Added prefixes
- **Orange:** Removed prefixes
- Green: Origin changes

# Conclusions

- Normal change pattern
- Periodic dips on Saturday and Sundays
- Stable BGP activity
- Operators take their responsibility and maintain their networks

# Measuring Network Delays

# Background

- Started during Internet Health Hackathon by Romain Fontugne
- RIPE Atlas
- Provides and interface to show network delays
- Delays between major eyeball networks and some other networks in a specific country
  - Google
  - AMS-IX
  - DECIX

Petrit Hasani 21 April 2020 Albanian Networking Community

### **Measurement Results**

One month before lockdown

Lockdown (13 March)

### ALBTELECOM-AS Albtelecom Sh.a., AL (AS42313)

Petrit Hasani | 21 April 2020 | Albanian Networking Community

# Mar 13 Mar 15

# **Measurement Results**

Petrit Hasani 21 April 2020 Albanian Networking Community

# AS3269 to DE-CIX (Frankfurt) AS3269 to AMS-IX (Amsterdam) Mar 13 Mar 15

80 Median RTT (ms) 60

Lockdown (9 March)

# Conclusions

- Increased traffic, some congestion
- But overall the Internet is doing well

• Interface:

https://ihr.iijlab.net/ihr/en-us/covid19

- Currently only countries that had a clear lockdown start date
- More on RIPE Labs:
