

**RIPE NCC**

RIPE NETWORK COORDINATION CENTRE

# RIPE NCC and Academia

Gergana Petrova | e-Age 18 | 11-12 December 2019

# What is an RIR?

- A Regional Internet Registry (RIR) manages the allocation and registration of Internet number resources in a particular region of the world and maintains a unique registry of all IP numbers issued.
- Number resources include:
  - IP addresses (IPv4 and IPv6)
  - Autonomous System (AS) Numbers
- Independent, not-for-profit, membership organisation

# Where are the RIRs?

**ARIN**  
American Registry for Internet Numbers

 **RIPE NCC**  
RIPE NETWORK COORDINATION CENTRE

lacnic 

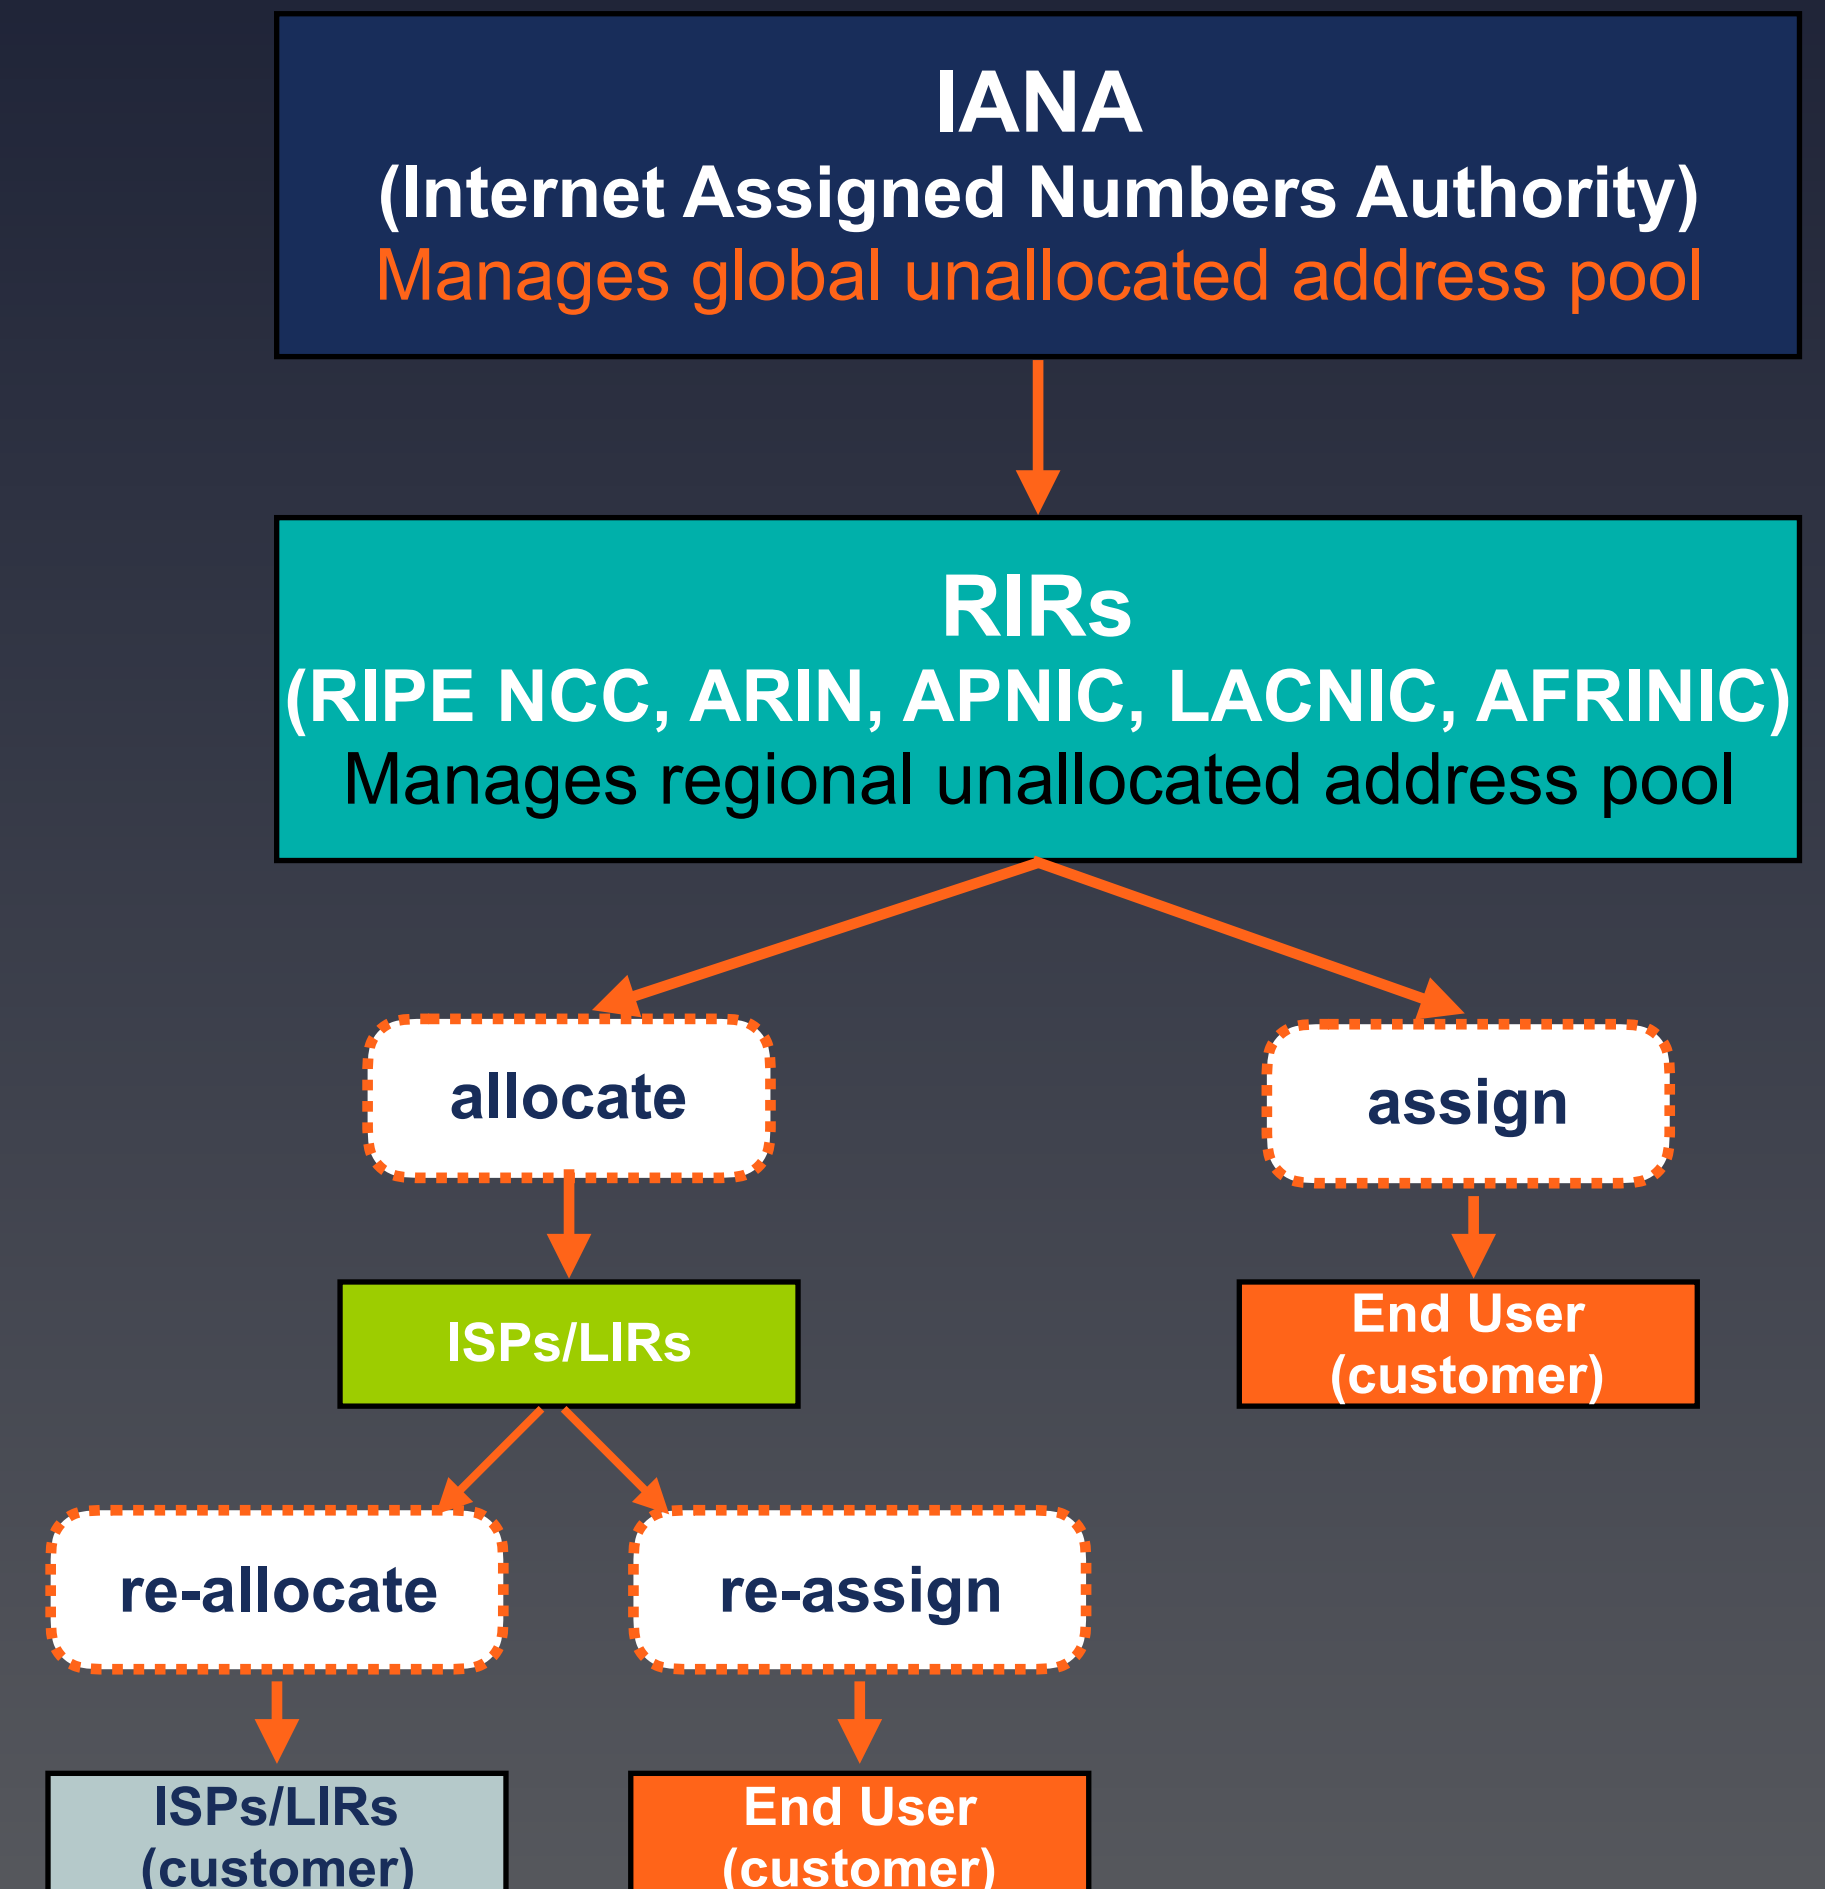

**AFRINIC**  
The Internet Numbers Registry for Africa

 **APNIC**

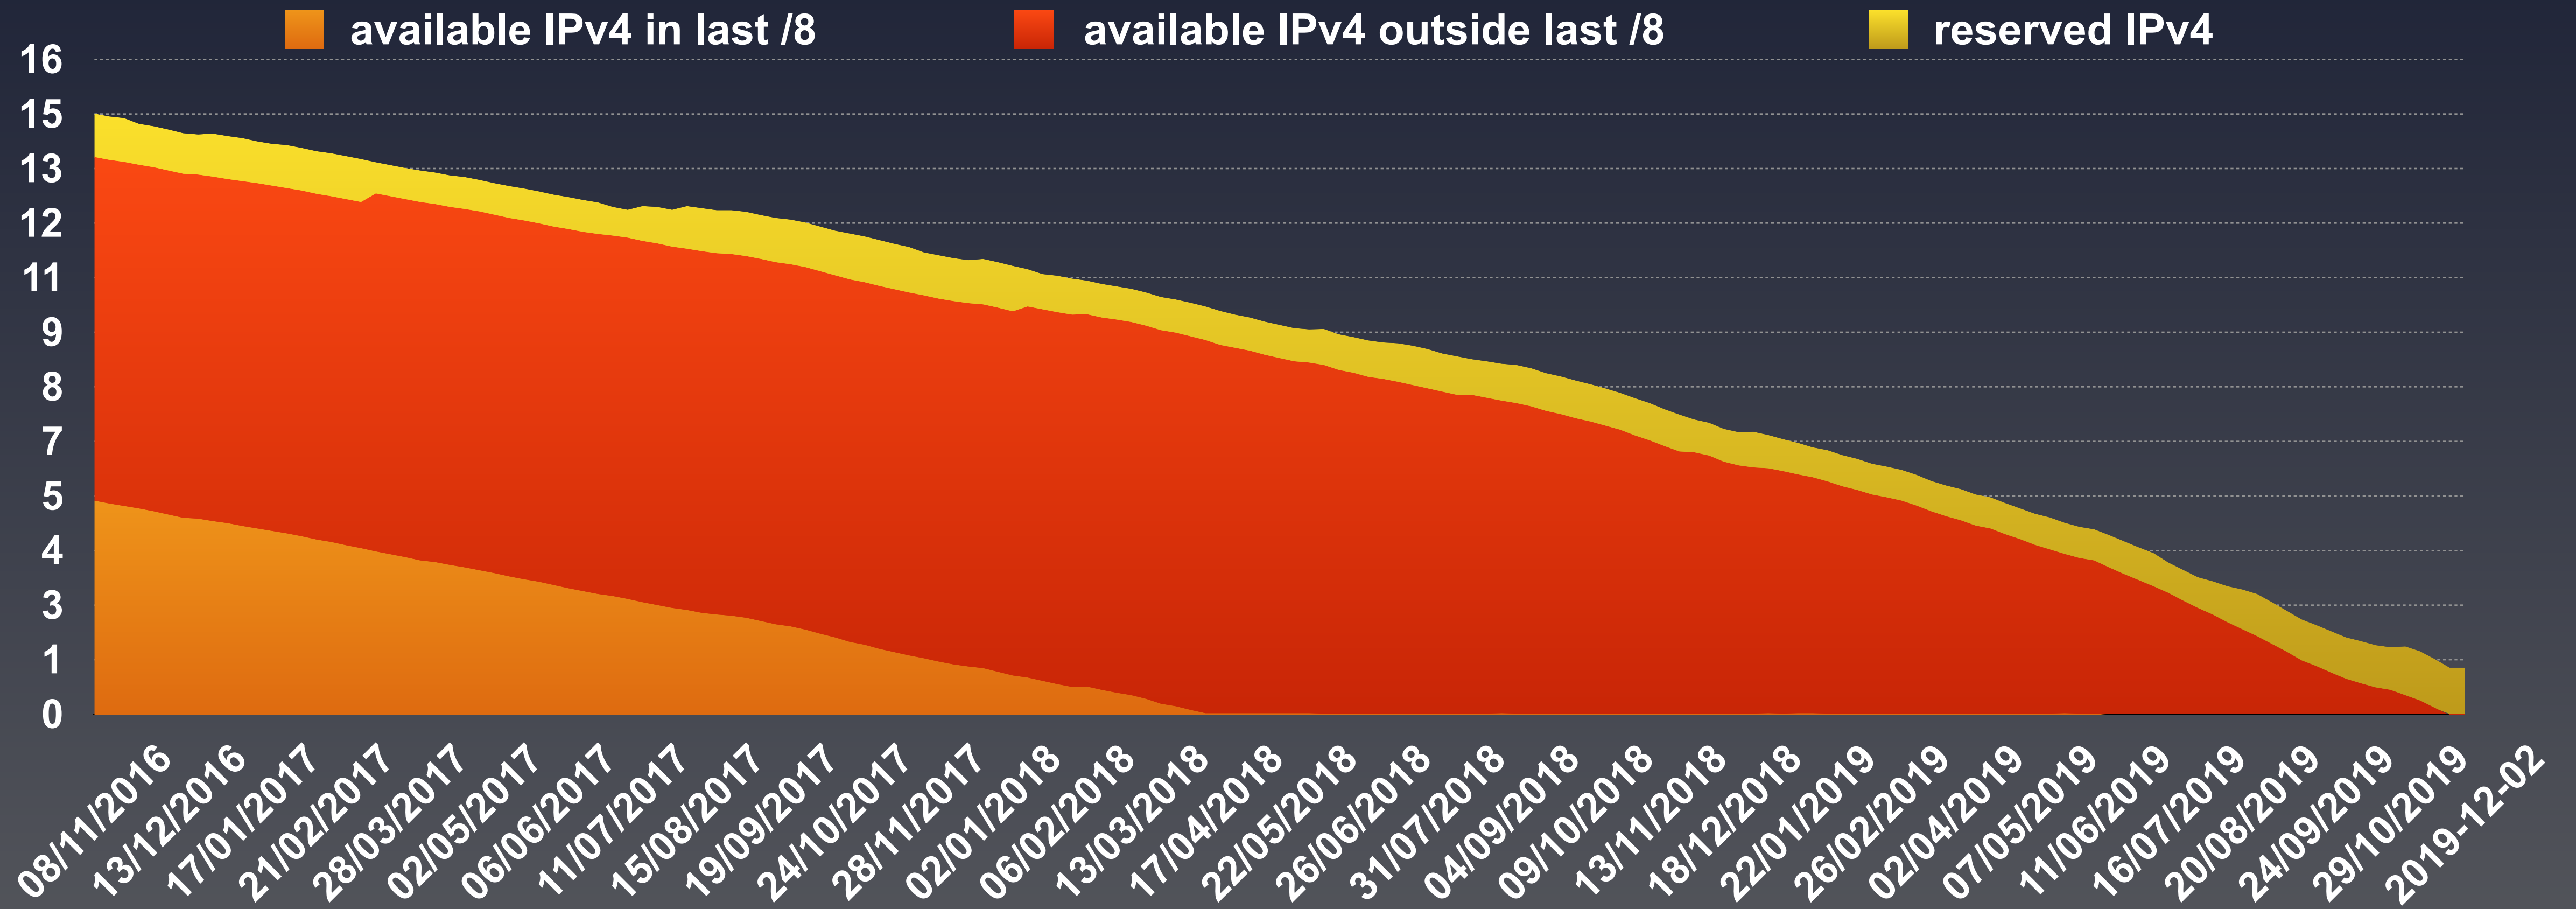

# Core RIR Functions

- Receive large IP address blocks from IANA
  - Distribute those in smaller blocks to its members
  - Publish and maintain a list of who has which block
  - Implement the rules (policies) set by the RIPE community
- Support the infrastructure of the Internet through technical coordination
- Provide services for the benefit of the Internet community at large

# RIPE NCC's IPv4 Address Pool

<https://www.ripe.net/manage-ips-and-asns/ipv4/ipv4-available-pool>

# Still Recovering Some IPv4 bits

- from organisations that have gone out of business
- from closed LIR accounts
- from networks that return addresses they no longer need
- so far in 2019: recovered 2547 /24s
  - this was already redistributed before the 25 November runout

# The Waiting List

Only LIRs that have never received an IPv4 allocation from the RIPE NCC (of any size) may request addresses from the waiting list, and they are only eligible to receive a single /24 allocation.

# The Waiting List

- LIRs that have submitted an IPv4 request can see their position on the waiting list in the LIR Portal

# What is in the RIPE Database?

- Registration information about
  - IP addresses and AS Numbers issued by the RIPE NCC
  - IP addresses and AS Numbers issued prior to the establishment of the RIRs (legacy space)
  - Original registration date
  - Organisations that hold these resources (ORGs)
  - Points of Contact for resources or organisations (POCs)
  - Customer reassignment information (from ISPs to their customers)
  - Referential information to the authoritative RIR

# What is not in the RIPE Database?

- Domain names
- Certain customer reassignments
  - Example: private residence
- Accurate geographic location of the network or end user customer

# RIPE Atlas

- Global Internet measurement platform
- More than 10,000 probes collecting nearly 8,000 results/sec
- Active measurements:
  - Ping
  - Traceroute
  - DNS
  - SSL/TLS
  - NTP
  - HTTP(S)

[atlas.ripe.net](https://atlas.ripe.net)

# RIPE Atlas

- Monitor network reachability from thousands of global vantage points
- Troubleshoot network issues with quick connectivity checks
- Create alarms that work with your own monitoring tools
- Check responsiveness of DNS infrastructure, such as root name servers
- Test IPv6 connectivity

The screenshot shows the 'Step 1 Definitions' interface for creating a measurement. At the top, there are buttons for '+ Ping', '+ Traceroute', '+ DNS', '+ SSL', '+ HTTP', and '+ NTP'. The '+ Ping' button is highlighted with a red circle. Below this, a 'Ping measurement' configuration window is open, showing the following fields:

- Target:** An empty text input field with the placeholder text 'An IP address or hostname'.
- Address Family\*:** A dropdown menu currently set to 'IPv4'.
- Packets:** A numeric input field set to '3'.
- Size:** A numeric input field set to '48'.
- Advanced Options:** A section with a teal checkmark icon and the text 'Advanced Options'.
  - Packet interval:** An empty numeric input field with the placeholder text 'Time between packets (ms)'.
  - Skip DNS check:** An unchecked checkbox with the text 'Disables target DNS check on measurement creation'.
- Description:** A text input field containing 'Ping measurement'.
- Interval:** A numeric input field set to '240' with the text 'How often this should be done (seconds between samples). Note that this value is ignored for one-off measurements.'
- Resolve on Probe:** An unchecked checkbox with the text 'Force the probe to do DNS resolution'.
- Spread:** An empty numeric input field with the text 'Spread of uniformly distributed random probe start time phase'.

# Online Learning

- The RIPE Academy ([academy.ripe.net](https://academy.ripe.net))
  - Local Internet Registry, RIPE Database, IPv6
  - Enrol and get a certificate (it's free!)
  - Down for maintenance 2-27 January; updated courses
- Webinars ([ripe.net/support/training/learn-online/webinars](https://ripe.net/support/training/learn-online/webinars))
  - RIPE Database, IPv6 addressing, RIPE Atlas, Internet Governance
  - You can also watch recordings of past webinars
- Coming soon: RIPE NCC Certified Professionals

**RACI**

The RIPE Academic Cooperation Initiative

# What is RACI?

- Started in 2013 to connect the RIPE and research communities
- Allows academics to present and connect to industry, professionals
- Offers academics the chance to receive feedback from industry professionals
- Successful applicants receive meeting tickets, travel and accommodation to attend
- Applicants can publish their work through RIPE Labs ([labs.ripe.net](http://labs.ripe.net))

# Examples of Relevant Topics

- Network measurements and analyses
- IPv6 deployment
- BGP routing
- Network security
- Internet governance
- Peering and interconnectivity
- Internet of Things

# Submit short abstract and draft slides

By 19 January

- **MENOG 20: 15-19 March, Manama**
- **SEE 9: 20-21 April, Ljubljana**

By 9 February

- **RIPE 80: 11-15 May, Berlin**
- **ENOG 17: 8-9 June, Moscow**

[ripe.net/raci](https://ripe.net/raci)

# RACI so far

- about 75 applications per round (twice per year)
- 5-10 accepted for RIPE Meetings
- 2-3 accepted for MENO, ENOG, SEE, RIPE NCC Days
- since 2015 - 78 academics from 32 countries funded
  - some multiple times

*RACI at RIPE 78 in Reykjavik*

# Why take part?

- 77.50% made contact with industry professionals (network operators)
- 75.00% received useful feedback on their research
- 62.50% learnt about new ideas/tools/techniques which will be useful for future research
- 57.5% met people they could collaborate with
- 52.5% improved their presentation skills
- 50% made new academic contacts
- 15% made potential employment contacts

# RACI in the RIPE community

- 30% of RACI attendees return to our meetings
- Chair RIPE Programme Committee
- Member SEE Programme Committee
- Member of Selection Committee for the RIPE NCC Community Projects Fund
- Done research at RIPE NCC offices
- Published multiple RIPE Labs articles

# Testimonials

One of the best experiences in my PhD career.

The mentoring program was especially useful and vital for newcomers to get comfortable in the environment. I am still in contact with my mentor.

I was able to meet and interview many of the engineers whose decisions I was studying through measurements. This provided me with many insights that turned out to be crucial for my PhD.

RACI is a great opportunity to meet people that actually run today's networks, understanding relevant concerns and needs.

Usually, I attend conferences with people from similar expertise and research areas - mostly from academia. It was different at a RIPE Meeting. The dynamics, the range of expertise, as well as the diversity it represents, was quality.

The RIPE meeting is a unique event to meet the Internet community and share ideas. It is a friendly and supportive community, helping to expand our network for future research and jobs.

# Testimonials

When I applied for the RACI programme in 2017, I had ***just started*** working on my master thesis, an empirical study about operators' view on security misconfigurations. Talking in front of ***my target group*** about things they knew way more about than I, ***was scary***. However, the study gained a lot of feedback, credibility and ***international interest***, and would not have been as successful without putting it out there.

Constanze Dietrich, then Technical University Berlin, now LEXTA Consultants
