

Memorandum of Understanding (MoU)

Between RIPE NCC (Réseaux IP Européens Network Coordination Centre)
and EuroDIG, the European Dialogue on Internet Governance.

Leipzig, 11 September 2014

With this memorandum of understanding (MoU) both parties agree to formalise and elaborate the existing cooperation. Since the early days RIPE NCC contributes financially and personnel to the success of the European Dialogue on Internet Governance.

With this agreement the involvement of RIPE NCC should be extended, which means more involvement in the planning and organisation of the annual event, as well as the strategic coordination of the EuroDIG association.

As institutional partner RIPE NCC will be consulted and included into decision making processes, such as drafting the programme or the messages, choosing host, countries and dates, reaching out for key participants. Furthermore RIPE NCC can contribute with the outstanding expertise in technical matters, like developing the website or remote participation.

This cooperation is agreed for the next 3 years from September 2014, which goes along with the next 3 editions of EuroDIG.

The Pan-European dialogue on Internet governance (EuroDIG) is an open platform for informal and inclusive discussion and exchange on public policy issues related to Internet Governance (IG) between stakeholders from all over Europe. It was created in 2008 by a number of key stakeholders representing various European stakeholder groups working in the field of IG. EuroDIG is a network which is open to all European stakeholders that are interested in contributing to an open and interactive discussion on IG issues.
