

# Internet Governance Forum 2010

- Held in Vilnius, Lithuania, 14-17 September
- Roughly 1800 attendees from 107 countries
- 98 workshops
- Main sessions on
  - Critical Internet Resources
  - Development
  - Access and Diversity
  - Security, Openness and Privacy
  - Cloud Computing

# NRO Workshops (1)

- IPv6 Around The World
- Discussion of IPv6 deployment and initiatives from Europe, Asia, the Middle East, Africa and South America:
  - go6.si initiative from Slovenia
  - NIC.br program in Brazil
  - German government IPv6 adoption
- Main points:
  - “The business case for IPv6 is business continuity”
  - “Government a key pusher of technological innovation”

## NRO Workshops (2)

- Enhancing Transparency in Internet Governance
- Speakers from business, government, civil society
- Roundtable discussion of benefits of transparency and where each sector can improve
- Main points:
  - “Visibility is just the first step; need to promote understanding”
  - “We still need to effectively define Internet governance”
  - “Law enforcement, government and industry need to work together”

## Other NRO Involvement

- RIR representatives took part in workshops on:
  - RPKI (Internet resource certification)
  - Cross-border law enforcement issues
  - Internet issues in the developing world
- NRO representatives spoke in the main session on Critical Internet Resources about the need for global IPv6 adoption

## Next Steps

- RIPE NCC plans to continue multi-stakeholder discussions on enhancing transparency:
  - Cooperation Working Group
  - RIPE NCC Government Roundtable events
- United Nations to decide on IGF continuation in December 2010
  - IGF 2011 already planned to take place in Nairobi, Kenya, September 2011
