ITU PP14: RIPE and RIPE NCC Priorities

Chris Buckridge

Senior External Relations Officer

chrisb@ripe.net

- RIPE NCC is a technical organisation
- Our preferred method of engagement with the ITU is cooperation
 - Capacity building
 - Information sharing
 - Networking
- RIPE NCC is a Sector Member of Development and Standardization sectors
 - Follow and contribute where appropriate on issues directly related to our remit e.g. IP addressing issues

Our team in Busan:

Chris Buckridge

Maxim Burtikov

Chafic Chaya

- Engage participants on specific issues where we can contribute expertise
- Follow developments on behalf of our membership and community

- Our goals / concerns ARE:
 - Questions regarding changes to existing IP address management arrangements *e.g. Res. 180*
 - Understanding Member State concerns behind such questions
 - Defending and explaining bottom-up, open, inclusive IP address policy making processes
 - Identifying productive opportunities for cooperation
- Our goals / concerns are NOT:
 - Pushing changes to how the ITU works
 - Engaging in political disputes

- Are there specific Internet-related proposals at PP14 that you are concerned about?
- Are there issues on which you think the RIPE NCC should contribute more information?
